EDUCATION

University of Michigan – College of Literature, Science, and the Arts

Ann Arbor, MI

Bachelor of Science; GPA: 3.7/4.0

Expected May 2030

- **Relevant Coursework:** Data Science 101, Math 103, Math 105, AP Calculus BC, AP Chemistry

EXPERIENCE

Waukegan High School | *Data & Information Coordinator*

- Designed a structured data schema to organize and track donations collected during a community food drive.
- Categorized nonperishable goods into specific item types to improve organization and simplify resource tracking.
- Supported the distribution and organization of resources that ultimately served **500+ families**.

Color Guard | *Data & Attendance Organizer*

- Designed a data schema to organize attendance and participation hours for a high school color guard organization.
- Tracked member participation across events, maintaining structured records for **100+ club members**.
- Organized attendance and event-hour data into a centralized system for monitoring member engagement.

National Honor Society | *Application Data Coordinator*

- Created an online application and data-tracking system for incoming National Honor Society members.
- Structured applicant information around experiences, activities, and character qualities for organized evaluation.
- Developed a repeatable process for tracking and reviewing approximately **50 applicants annually**.

PROJECTS

Personal Portfolio Website | *Independent Project*

- Designed and developed a personal portfolio website from scratch using **HTML and CSS**, independently teaching myself web development skills.
- Used **Visual Studio Code and GitHub** to write, manage, and organize the website's code throughout the development process.
- Published and deployed the completed website online, making the portfolio publicly accessible and demonstrating the ability to independently build and launch a web project.

Graduation Ceremony Planning | *Student-Led Initiative*

- Surveyed graduating students to collect data on seating preferences, speech selections, and ceremony logistics, using student feedback to inform planning decisions.
- Analyzed student responses and translated survey findings into recommendations for seating arrangements, speech participation, and the order of students during the graduation ceremony.
- Presented findings and collaborated with **school board members** to incorporate student perspectives into the final graduation ceremony format.

Data Science in the NBA | *Independent Research*

- Researched data science careers within the NBA to explore how professional basketball organizations use data to inform decision-making.
- Examined the work of **Ivana Šerić with the Philadelphia 76ers**, focusing on how data analysis can generate insights for coaching staff.
- Explored applications of data analysis in the **sports industry**, strengthening understanding of data-driven decision-making in professional basketball.

SKILLS

Programming: Python, HTML, CSS

Tools: GitHub, Visual Studio Code

Data: Data Organization, Data Tracking, Schema Design, Data Analysis

Languages: English, Spanish (Bilingual)

Interests: Music, Football, Clothes, Basketball, Overwatch, Dead by Daylight
